**TRAFFIC RESTRICTIONS ON I-93 AT EXIT 4 IN LONDONDERRY
TO ALLOW INSTALLATION OF AERIAL CABLE FOR TRAFFIC SIGNALS**

The New Hampshire Department of Transportation announces State Police rolling roadblocks will be used on Interstate 93 in Londonderry early on the morning of Wednesday, August 14, 2002.

These rolling roadblocks, which will occur between 5:00 am and 6:00 am on August 14, are needed to complete an aerial cable crossing of both Interstate 93 northbound and southbound at Exit 4. The rolling roadblocks will start at Exit 3 on the northbound side and Exit 5 on the southbound side of I-93.

This work is part of a project making alterations to seven intersections on NH Route 102 to improve traffic flow.

East Coast Signals of Rochester, New Hampshire is the general contractor for the \$293,000 project, which is scheduled to be completed this month.
